

DMX RGB color COB LED Flood Light

Features

- ISEELED Tech provide COB type 10-15W, 30W, 45W RGB DMX LED flood light
- COB LED use less led to get same light output comparing with the 1-3W high power led
- COB RGB LED get at least 20,000 hours service life.
- Standard DMX 512 control, 44 frames/second, manual or auto-addressing.
- Easy to install, and fast get through input and output connector.
- Protection: IP65.
- Application: entertainment led lighting or architecture led lighting installation.

LED Window Light

Features

- ISEELED Tech product line RGB LED window light and single color LED window light to the market.
- Specific light beam make the led window light good performance in shining the window.
- High Brightness 1-3W Cree LED to get a pure light and the led long service life at least 50,000 hours.
- Standard DMX 512 control, 44 frames/second, auto-addressing for series connection.
- Easy to install, and fast get through input and output connector.
- Protection: IP67.
- Application: architecture led lighting installation.

12W, 18W, 24W DMX LED Underwater Light

Features

- We provide round dmx led underwater light in 12W, 18W, 24W, small ring and bigger ring.
- Standard hole to match perfectly with the fountain valve.
- High Brightness 1W, 3W led and long service life at least 50,000 hours.
- Standard DMX 512 control, 44 frames/second, manual or auto-addressing.
- Detachable bracket for easy installation and adjustable the wall washer angle.
- Protection: IP68.
- Application: architecture led lighting installation for fountain light and pool light.

High Power Underground LED Light

Features

- We provide customized service in high power DMX LED underground light.
- Round dot type and long strip LED underground light is available.
- High Brightness 1W, 3W led and long service life at least 50,000 hours.
- Standard DMX 512 control, 44 frames/second, manual or auto-addressing.
- Easy to install and fast get through input and output connector.

Features

- Completely follow standard USITT DMX512/1990 protocol and the expanded DMX512 protocol.
- Standard DMX artnet controller and Lightning artnet controller compatible with WS2801, WS2811, SM16716, TM1804, UCS1903 etc with external DMX 512 decoder.
- Easy artnet controller compatible with SPI signal directly without external decoder.
- Several standard DMX artnet or Easy artnet no need IP switch but an IP switch needed between several lightning artnet controller.
- Perfect synchronization between each universe of the 3 series of artnet controller.
- Implementing the Gamma Correction Algorithm based on the human visual system. It make color more abundance and satiation.
- Compatible with Art-net protocol and Madrix software which allows music to lights and sound to lights.
- The artnet controller suitable for architectural and entertainment lighting, different series to meet different needs.
- Standard controller can set the IP address and controller name via artnet setting software.
- Lightning controller can set the IP address and controller name via web.
- Easy artnet controller can set the IP address in the free led player software.

Working Environment	IP 20	IP 20	IP 20 / IP 24 for rainproof
Installation	Rack or Screw installation	Rack or Screw installation	Screw installation

Features

- Each DVI LED controller maximum load 400,000 pixels with total 4 network output ports, and can expand the pixels with DVI distributor to connected with several DVI LED controller.
- High speed transmit through DVI/HDMI interfaces.
- Applied duplication mode when connected to computer with 32-bit and 64-bit operating systems.
- Support 4 output and 8 output slave controller 4.
- Through LAN cable signal transmit distance upto 100M, and upto 25KM by using photo electrical converter.

Features

- 01SC has one output port, can control maximum 1024 pixels.
- 02SC has two output ports, can control maximum 2048 pixels.
- 03SA has eight output ports, can control maximum 8192 pixels.
- Use the DIP switch to set the play mode and speed, the SD card can be in and out with power-on.
- SD card supports FAT32 and FAT16 format, the maximum capacity is 64G bytes, stores maximum 64 DAT files.
- The type of driver chip and scanning frequency are set in "LED Build Software".
- Achieve encryption function by limiting the number of power-on time, which is set in DAT file.

Notes:	1, Several different SD card controller can realize AC synchronous. 2, Beside the standard easy SD card controller, the IR SD card controller, Timing SD card controller, GPS SD card controller, etc to meet multiple application.		

3CH*6A/CH

4CH*6A/CH

6CH*6A/CH

24CH*5A/CH

Features

- LED PWM decoder received standard DMX 512 signal and transforms it into PWM signal to driver LED,
- 3CH*6A/CH, 4CH*6A/CH, 6CH*6A/CH, 24CH*5A/CH are available.
- DMX address can be set by DIP switch on the decoder.
- 0-100% dimming, 1024 gray level, 500Hz frequency.
- User can use the LED decoder separately or connected them with ISEELED artnet controllers or SD card controllers.
- Connected a DMX signal amplifier each 20 pcs LED.
- The difference between the different led decoder, besides the output channels and output current, the connection is different for different application, especially for 6CH led decoder.

LED-DMXSPI

Waterproof DMX SPI

Features

- LED DMX SPI decoder receives standard DMX 512 signal and transforms it into SPI signal to driver LED.
- Indoor use LED-DMXSPI or waterproof application are available.
- DMX address can be set by DIP switch on the decoder or use dmx led address writer for waterproof decoder.
- LED-DMXSPI decode 512 dmx channels and can customized define the SPI pixel quantity together in a same dmx address.
- User can connected the LED DMX SPI decoder with ISEELED artnet controllers or SD card controllers.

Parameters

DMX Terminal Resistor

Features

- The DMX Terminator plugs into the feed-through connector of the final DMX device on a control cable.
- Using the DMX Terminator improves signal reliability by preventing reflections and reducing ringing.

Parameters

Mode	LED-DT-4
Working Voltage	0-300V
Working Current	0-8A
IP Rating	Ip65
Length	5cm
Weight	9 g

[DMX Address Writer]

Features

- LED DMX address writer to use for dmx address manual setting led light. Due to different DMX 512 LED lights use different DMX IC driver, so there are different types dmx address writers.
- The DMX address writer can set the dmx address one channel by one channel.
- The DMX address writer can test the address of the each channels after you set the dmx address which perform as a lighting testing function.
- User can set the DMX address for several groups/universe of lamps with same address.

Parameters

Madrix introduction

- MADRIX® is the LED lighting controller and software brand.
- It is a feature-rich and intuitive software.
- The application is both an effect generator and media server with outstanding capabilities to display unique real-time effects on your LEDs. Endless stunning and fully customizable visuals are created live by you using pixel mapping (2D), voxel mapping (3D), and the built-in graphics and rendering engine.
- Complementary MADRIX® hardware reliably controls your LED installation via MADRIX® –the centerpiece of our intuitive products. This provides a seamless integration of both software and hardware and high performance.

Features

- Real-time audio analysis
- Support online controller
- Easy to use

Specification

Supported Operating Systems,

- Microsoft® Windows® Vista
- Microsoft® Windows® 7
- Microsoft® Windows® 8
- Microsoft® Windows® 8.1
- Microsoft® Windows® 10
- Compatible with 32 bit and 64 bit

Minimum System Requirements,

- 2.0 GHz dual-core CPU
- OpenGL 2.0 graphics card (NVIDIA recommended)
- 2GB RAM
- 1 GB free hard disk space
- 1280 * 768 screen resolution
- Network card
- Sound card
- USB 2.0

Usage

- Effect generator
- Pixel mapper
- Media server
- For LJs, Vjs, and other lighting professionals
